A. L. METZ, M. Ph., M. D., Instructor in charge of the Chemical Laboratory.

T. A. QUAYLE, M. Ph., M. D., Assistant Instructor in charge of the Chemical Laboratory.

A. L. Metz, M. Ph., M. D., Instructor in charge of the Pharmaceutical Laboratory.

WARREN S. BICKHAM, M. D., Demonstrator of Operative Surgery.

# THE ANNUAL REPORT OF 1894,

To the President of the University, by

# PROF. STANFORD E CHAILLE, M. D.,

Dean of the Medical Faculty, at the

# annual Commencement of the

# MEDICAL DEPARTMENT OF THE TULANE UNIVERSITY OF LOUISIANA.

Held at New Orleans, April 18th, 1804.

Mr. President—During the sixty years that have elapsed since the origin of our medical department, in 1834, there have been registered on its record of students 10,905 names, and 3141 students have been graduated, viz: 2895 in medicine and 246 in pharmacy. My last annual report called attention to the exceptional labors and responsibilities, and, therefore, to the very unusual anxiety imposed on the faculty for the next session; that is, for the session now closing. In April, 1893, the faculty had, before its removal from the building occupied for forty-six years to a new building which then required much wearisome labor for completion and useful occupation. New and extensive laboratories demanded very onerous equipment; additional courses of study and additional teachers had to be provided; important regulations which had prevailed for forty-nine years were to be substituted by regulations, exacting from students proofs of preparatory education, attendance on not less than three annual sessions and these of greater length, and attendance on three additional laboratory courses; in fine, exacting so much more than heretofore of students that the number of these would very surely be diminished. And hence the faculty had to face that frequent experience of life which adds much to its bitterness—increased expenses with diminished receipts.

its bitterness—increased expenses with diminished receipts.

The exceptional labors and disadvantages anticipated have all been realized: but, encountered with foresight and determination, they have been so overcome that our college is safe for the present, and more secure of the future than ever before. These gratifying results have been due to the good repute of our college derived from the past labors of its faculty, and to the able and zealous discharge of duty by those who now labor for the college, by professors, instructors and employes. Of these the greatest debt of gratitude is due to Prof. Souchon, the faculty's chosen agent to supervise the erection and equipment of the new building. His duties were so ably discharged that the dean was relieved from an overwhelming burden, and that our building, as long as it lasts, will bear witness to his admirable foresight and to his painstaking and inexhaustible care, not only as to many important details, but also as to innumerable little things.

Gradually increasing during my incumbency of the deanship from 223 students in 1885, there were in 1893 420 students, the greatest number ever recorded. The friends of our col-

lege were then warned that, for causes already alluded to, there would be a notable decrease in the number of our students at the present session. It was feared that this decrease might amount to 20, and possibly to even 25 per cent. Since our last commencement there supervened another unfavorable cause, the so-called "hard times;" for such times have always diminished the number of our classes. Notwithstanding all of these unfavorable causes tending to reduce the number of our class, the total number of students attending the present session was 37.7, a larger number than we had in 1890, and only 10 per cent less than attended the maximum session of 1893.

Notwithstanding all of these unfavorable causes tending to reduce the number of our class, the total number of students attending the present session was 377, a larger number than we had in 1890, and only 10 per cent less than attended the maximum session of 1893.

In 1888, the dean began publicly to advocate the very great benefits which accrued, not merely to the medical profession, but chiefly to the public from medical colleges, especially of our college, and to appeal to philanthropists to come to our aid; and this appeal was continued year after year. A serious impediment to success was, on the one hand, the common and natural belief that donations to a medical college would financially benefit professors chiefly and benefit the public little, if at all; and, on the other hand, the reluctance of philanthropists, anxious to promote the public good, to see their donations diverted into the pockets of professors. The dean declared that no such result was desired; that, in fact, all the professors of our college would cheerfully sacrifice part of their salaries in order to promote the prosperity of our college, and that if a donation were wisely conferred, professors would be forced to unite with any philanthropic donor in making pecuniary sacrifices for the college.

donor in making pecuniary sacrifices for the college.

As is well known, a very generous and adequate donation was conferred in 1891, and was so extended that medical education would reap all its benefits; for, while very superior advantages were secured, yet the current expenses were very greatly increased without a corresponding increase of revenue, and these increased annual expenses had to be borne by the faculty. The result has been that, while sufficient money has been provided by the faculty to supply many invaluable additions to our curriculum of studies and to meet the greatly increased annual expenses, the salaries of professors have thereby been very seriously lessened, and the assurance of the dean that the donation would redound wholly to the benefit of medical education and of the public has been amply verified.

were present this session. However, there were present this session and will be at the next session of 1894-95 two sets of students. One set, whose number is very difficult to estimate attended. attended their first session cal college prior to Sept. and are still permitted luated after attendance on timate. medical 1. and are graduated after 1893, to be only two annual sessions and are subjected to the same less onerous regulations which prevailed prior to 1893. A second set, who first began their medical college careers after Sept. 1, 1893, are forced to attend not less than three annual sessions, to submit proofs of preliminary education, to take all laboratory courses and to be subject to all new regulations. For such reasons it is unusually difficult to estimate the probable number of our next class, and the future of this college, with the proba-ble number of its students, cannot be clearly foreseen until the session of 1895-96, when all students will be subjected to the same regulations, and when every graduate must have attended not less than three annual sessions in a reputable medical college and must have complied with all of our new and more exacting regulations. But, although our college is now in a stage of transition, undergoing important changes and somewhat uncertain as to the future number of its students, yet all the surrounding conditions justify the most sanguine anticipations.

A generous benefactor has given us a building which is unsurpassed in its adaptation to the needs of medical education, supplied with abundant light and ventilation, with ample lecture and recitation rooms, with museum and library, and, best of all, with large and well-equipped laboratories of practical auctomy and operative surgery, of microscopy and bacteriology, of chemistry and of pharmacy. Even the great fire which ravaged this building on the night of March 31, 1894, has been deemed a good omen, for it was limited to the upper lecture room, or amphitheatre, and spared all those parts—laboratories, museum, library which contain numerous valuable little things, very difficult to replace. If our guardian angel, St. Luke, whose statue, serene and unharmed, maintained its place high on our outer wall, had guided that fire it could not have been directed to the greater satisfaction of the faculty: so that the great fire did not cause an hour's loss in the curriculum of studies. and so that all damages will be fully repaired and every vestige of the conflagration have disappeared long before our next session will begin. A board of wise and liberal administrators

has given us extensive grounds, part of which the faculty hopes soon to utilize as a gymnasium for the health and recreation of our students, and all of which the faculty has so adorned with grass, hedges, trees and vines that in a few years, when all these have sufficiently grown, our building and its grounds will constitute one of the most beautiful ornaments possessed by New Orleans, and one of the most conspicuous gems in the crown of Tulane University.

To these great and exceptional advantages of our college must be added its greatest and its unequalled superiority in the use of our

No reason is now apparent why as many great Charity Hospital, with its close proximistudents should not attend the next session as ty to our college building, with its liberal regulations, due to the exceptionally wise laws of Louisiana, which favor to unusual extent the admission and instruction of our students; and with its 30,000 sick annually an unequalled and incomparable field for the study of the diseases of the great Southwest.

If, to all these superiorities, there be added our numerous corps of competent professors and instructors, zealous in the discharge of duty, it becomes impossible to contemplate the future of our college with other than very sanguine hope. After a very few sessions, the maximum number of students, heretofore attending annually, 420 in 1893, will no doubt be surpassed, and not many years should clapse before our building will be filled with the 600 students it can contain—a number less than the geographical position of New Orleans as a medical centre entitles it to; a number less than the exceptional superiorities of our college should attract.

Graduates of 1894, although this day severs the strong bond of teacher and pupil which has long united us, the members of your faculty hope that there will still be continued the affectionate interest and the friendship which time has fostered, and that you will still look

to them for counsel and help.

To you, graduates, and to all students attending this session, the dean entertains a tending this session, the dean entertains a feeling of unusual gratitude. For while his duties during the present session have been more onerous and more harassing than during all of the eight sessions previously served by him, yet you students have, by your personal conduct, added nothing to the burden borne. Gladly do I testify that your deportment has been such that not one report has reached me of had conduct within the college grounds on the part of any one of you. Though you num-ber 377, though you enjoy the vigorous youth which tempts to self-indulgence, thoughtless-ness and mischief; and though you belong to the maligned class of medical students, yet you have proved that medical students, very surely our medical students, when treated with justice and courtesy, are unsurpassed by any aggregation whatever of men in yielding to gentlemen the kind and thoughtful consideration due from gentlemen. To you, graduates of 1894, and to all students of this session, the dean, with a very grateful heart, presents his profound thanks, and in bidding you the official farewell of your faculty, the earnest hope is entertained that you will maintain throughout your lives a loving interest in this college, which has given you professional birth; and that, in the genial words of a well-loved Thespian, you and all your families may live long and prosper.

Mr. President, you are respectfully requested now to confer degrees upon 111 students. The 100 whose names will first be called are enti-tled to the degree of Doctor of Medicine, and the eleven who will be last named are entitled to the degree of Master of Pharmacy.

Prof. Wm. Preston Johnston, president of the university, then conferred degrees upon 111 graduates, whose names are published in the annual catalogue for 1893.

The Gold Medal and Certificate of the First Degree of Merit was awarded THIS HOUSE, for the Best Printing of Historical and Art Works published in Louisiana, by the World's Cotton Industrial Exposition of 1884-85,

# MEDICAL DEPARTMENT.

- 1. This institution, founded in 1834 as the "Medical College of Louisiana," became in 1847 the "Medical Department of the University of Louisiana," and in 1884 the "Medical Department of the Tulane University of Louisiana." It is the oldest medical college in the Southwest, and has the greatest number of alumni and of students. To April, 1894, it had registered the names of 10,905 students, and of these it had conferred diplomas on 3141—namely, on 2895 graduates in medicine, and 246 graduates in pharmacy.
- 2. The next annual course of instruction in this department, now in the sixtieth year of its existence, will begin on Thursday, October 18, 1894. The commencement will be held on Wednesday, April 17, 1895. There will be only three holidays, Christmas, New Years and Mardi Gras. The first two weeks of the term will be devoted especially to Clinical Medicine, Surgery, Obstetrics and Gynæcology in the wards and amphitheatre of the Charity Hospital; and to practical work in the Laboratories of Practical Anatomy (Dissecting Rooms), of Chemistry, of Pharmacy, and of Histology and Bacteriology. These laboratories will be open for instruction on Monday, October 22, 1894.
- 3. The Medical Department, as well as all reputable Southern Medical Colleges, have added to the obligatory studies heretofore required for graduation, Medical Jurisprudence and also one laboratory course in Chemistry, one in Histology and Bacteriology, and one in Operative Surgery. For these additions and for other important changes as to requirements for admission and for graduation, and as to fees, see subsequent paragraphs.

# New Building with its Laboratories.

4. The Medical Department now occupies a new site, twice the size of the former one and only two squares from the Charity Hospital, and thereon a four-story building (three stories above a most excellent basement which provides ample accommodation for larger classes and for all the needs now requisite to medical education; larger and better lecture and recitation rooms, and best of all ample and well equipped laboratories for Chemistry, for Pharmacy, for Practical Anatomy, for Operative Surgery, for Microscopical Anatomy, Pathology and Bacteriology, and working rooms for practical Physiology and for gross Pathological Anatomy. These admirable laboratories, now added to the unrivaled practical advantages for clinical, anatomical and pathological studies given by the Charity Hospital, enable the Medical Department to provide its students with unsurpassed advantages for their medical education. For other details of the new building see the last page of this catalogue and pages 3 and 4 of the cover.

# Clinical Instruction at the Charity Hospital.

5. The Faculty solicits the special attention not only of students but also of graduates of other colleges to the unequaled clinical and anatomical advantages of the Medical Department.

It is universally admitted that without abundant anatomical and clinical material no medical school, however numerous or eloquent its professors, can possibly fit its pupils for practical professional life. It is scarcely necessary to state that it is only in large cities that such advantages can be procured, but it is of paramount importance that the opportunities there afforded should be properly utilized; that the students should be required, under the direction of the teacher, to examine patients for themselves, to keep record of cases, to note daily changes which may occur, and thus acquaint themselves by personal observation with the progress and termination of diseases and accidents. The mere introduction of a patient into an amphitheatre, and the discussion of his case by the professor in the presence of a large class, is no substitute for bedside instruction, such as is offered by the great Charity Hospital of New Orleans; and no reduction of lecture fees, not even their entire abolition, can possibly compensate for the lack of

such opportunities. The use of the wards of this noble institution, with its seven hundred beds, and its annual occupancy thereof by eight or more thousand patients, and the use of the two clinical buildings, with more than twenty thousand annual out-door patients, have been given by acts of the Legislature to the professors of the Medical Department of the Tulane University of Louisiana for the practical instruction of its students, not only in Medicine and Surgery, but also in Obstetrics and Gynæcology. Medical students are given access to the Charity Hospital without payment of any hospital fees, and far better opportunities for the study of diseases therein than are usually enjoyed in the hospitals of other cities. For the study of the diseases of the Southwest, and also of the diseases of the negro race, there is no field comparable to the wards of this hospital. Between the new building of the Medical Department and the Charity Hospital there are only two squares, which distance is readily walked within three minutes.

The following table of 9283 cases treated in the wards of the Charity Hospital during the year 1893 will give some idea of the great advantages possessed by the Medical Department for the practical study of Medicine and Surgery:

Diseases,	Number of Cases.	Diseases.	Number of Cases.
Nervous system	282 847 1004	Venereal Bones and joints Toxic diseases. Eye, ear and nose. Skin. Local diseases and injuries All other diseases Total	165

There were 1184 deaths and 235 births, and a daily average of 605 in-door patients. In addition to the 9283 "in-door" patients there were 21,205 "out-door" patients treated, to whom 50,909 consultations were given. In addition to these there were 2055 cases of minor surgery attended out of clinic hours, in the Surgical Amphitheatre. The 21,205 out-door patients furnished for instruction the following valuable material, viz.: Medical cases, 5758; surgical, 4443; nervous, 487; venereal and skin, 2676; gynæcological, 1651; diseases of children, 2461; eye, ear, nose and throat, 1751; dentistry, 1978. It should be noted that the sum total of all cases treated in 1893 in the Charity Hospital was 32,543.

The grand total of in-door patients and out-door patients in the Charity Hospital was 30,483, of whom 11,674 were colored. There are sixteen wards for females. Of the fifty-two wards in the Charity Hospital there are twenty-three medical, fourteen surgical, two obstetrical and two gynæcological wards, two for children, four for diseases of the nervous system, two for venereal diseases, two for diseases of the eye and ear, and one for skin diseases; and all these wards are accessible to students.

There are besides two admirable two-storied clinical buildings for out-door patients. Each of these buildings is subdivided into eight different services, and seven of these are alike in both buildings, viz.: A service for medical cases; for nervous diseases; for surgical cases; for venereal and skin diseases; those of the eye; of the ear, nose and throat; and for cases of dentistry. In addition to these seven services the "Men and Boys' Clinic" has a surgical sérvice for boys, and the "Women and Children's Clinic" has a gynæcological service.

It is manifest that these facilities for *genuine* clinical teaching, which recent improvements in the hospital have greatly increased, are now unsurpassed by any medical college in the United States, and that such advantages in medical education are being more and more appreciated is attested by the increasing size of the classes.

6. The professors and clinical instructors are Attending Physicians or Surgeons of the Hospital, and visit their wards daily, accompanied by the students,

who are thus brought into immediate contact with the sick and wounded, and are taught practically auscultation and percussion, analysis of urine, the use of the microscope in diagnosis, the application of dressings, etc. Surgical operations are performed and lectures delivered upon selected cases in the amphitheatre of the Hospital.

Special clinical instruction is given to the candidates for graduation and to all students, who are, for this purpose, divided into classes, and assigned to the respective professors and clinical instructors, in charge of wards in the Hospital. The classes thus formed interchange courses, so that all students enjoy equal advantages. Competent Chiefs of Clinic aid the clinical teachers in developing this system of instruction. The following professors and clinical instructors and their respective chiefs of clinic and assistants will be on duty the ensuing session:

Prof. ERNEST S. LEWIS, M. I	)	P. MICHINARD, M. D. H. S. COCRAM, M. D. S. FORTIER, M. D.	0
Prof. JOHN B. ELLIOTT, M. I		J. H. BEMISS, M. D. P. E. ARCHINARD, M. D. W. W. BUTTERWORTH, M. D.	Chiefs of
PROF. ALBERT B. MILES, M. I		MARION SOUCHON, M. D. JNO. J. LAURANS, M. D. H. J. SCHERCK, M. D. W. E. PARKER, M. D.	Clinic.
Prof. L. F. REYNAUD, M. D		JNO. B. ELLIOTT, JR., M. D.  J. MOORE SONIAT, M. D.	
DR. EDW. W. JONES. DR. ISADORE DYER. DR. J. D. BLOOM. DR. LUTHER SEXTON. DR. HENRY BAYON. DR. H. S. LEWIS.	Clinical Instructors.	DR. —	Assistant Clinical Instructors.

The regular lectures at the Hospital, on Clinical Medicine, by Professors Elliott and Reynaud; on Surgery, by Professors Miles and Souchon, and on Obstetrics and Diseases of Women and Children, by Prof. Lewis, will be delivered in the amphitheatre, daily, between 8:30 A. M. and 12 M.

Post-mortem examinations are made in the presence of the class by the Professor of Pathological Anatomy.

Diseases of the Eye and Ear are taught in the eye-wards and amphitheatre of the Hospital and constitute a part of the curriculum of the surgical chair.

Special instruction in diseases of the skin, diseases of children, physical diagnosis and minor surgery, is given by the Lecturers on these subjects.

7. The Administrators of the Charity Hospital elect annually, by competitive examination in March, fourteen resident students, who are entitled to board and lodging in the institution free of charge, and fourteen externes, who serve as assistants in the out-door clinics. Three resident students in the Touro Infirmary are also elected annually by competitive examination.

## Lectures and Laboratories.

8. Lectures.—Systematic didactic instructions will be given daily, immediately after the hospital clinics, in the new building of the Medical Department on Canal street, between Villere and Robertson streets, only two blocks from the hospital. The means for illustrating the didactic lectures consist of numerous models in wax, papier maché, plaster and wood of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the Medical Department; very many tables and diagrams; a complete series of specimens in materia medica; surgical and obstetrical instruments and appliances; a large collection of natural, anatomical and pathological specimens and preparations, and a set of chemical and physical apparatus. The Professor of Anatomy illustrates his lectures with many specimens of microscopical anatomy under the microscope.

Hygiene and Medical Jurisprudence are now obligatory studies, and the lectures on these subjects are adequately illustrated. The assistant to the Professor of Chemistry and Medical Jurisprudence, is Dr. H. P. Jones.

# Chemical Laboratory.

9. This Laboratory readily accommodates eighty-four students working at the same time, and one course therein will be obligatory on all first-course students, and after the next session a certified course in the Chemical Laboratory of a medical college will be obligatory on all candidates for graduation. It has been placed in charge of Dr. A. L. Metz, M. Ph., who has been during the last seven years in charge of the Pharmaceutical Laboratory, and who continues in charge thereof. Dr. T. A. Quayle, M. Ph., is the assistant instructor in these Laboratories. Special attention will be given to medical chemistry and to such knowledge of Chemistry as will prove of greatest service to the practising physician. Every student will be provided with a separate table, apparatus and reagents.

# Microscopical Laboratory.

10. This laboratory readily accommodates eighty-four students working at the same time, and one course therein is obligatory on all candidates for graduation in 1896. Microscopical anatomy, both normal and morbid, and also bacteriology will be taught. This laboratory is in charge of Dr. P. E. Archinard, a pupil of Pasteur and of Koch. Dr. Archinard's assistant instructor is Dr. O. L. Pothier.

The fee for a special course in bacteriology will be \$25, but the fee for one regular course in microscopical anatomy and bacteriology is only \$15.

# Operative Surgery.

11. Will be practically taught in the Laboratory of Operative Surgery, and one course therein will be obligatory on all candidates for graduation after 1894-95. The instructor in charge is Dr. Warren S. Bickham. The entire field of General Surgery will be gone over, the steps of each operation being first admirably illustrated by means of an Electric Optical Projector, and fully explained by the Demonstrator, after which the students, in sections, will perform the operations in the presence of the Demonstrator and the class. One course in this laboratory is strenuously urged upon all candidates for graduation.

Those students desiring a certificate of attendance upon this course can obtain the same upon the payment of \$1.

# REQUIREMENTS FOR MATRICULATION AND FOR GRADUATION OF THE SOUTHERN MEDICAL COLLEGE ASSOCIATION.

- 12. In 1892 the American Medical College Association, to which belong all reputable northern medical colleges, and also some few southern medical colleges, enforced on medical students an educational qualification for admission and a three years' course for graduation. A Southern Medical College Association has since been organized and the Medical Department of the Tulane University of Louisiana, and all reputable southern medical colleges (which are not members of the American Medical College Association) are now members of the Southern Medical College Association. These southern colleges have united in requiring from students who had attended one full course, prior to Seprember 1, 1893, only two full courses for graduation, and no educational qualification other than furnished by the final examination. However, these privileges have been limited to the session of 1894-95 by the following resolution, adopted November 15, 1893, by the Southern Medical College Association: "That after the next annual session (1894-95) every medical student, whether first admitted before or after September 1, 1893, must have attended in a regular and reputable medical college three full courses, in three separate years, before he can be graduated."
- 13. But, on students who may have attended their first course in a medical college after September 1, 1893, the following new requirements for admission and for graduation will be obligatory.

# "Requirements for Matriculation.

"Every student applying for matriculation must possess the following qualications:

14. "He must hold a certificate as the pupil of some known reputable physician, showing his moral character and general fitness to enter upon the study of medicine. [For a blank form of this certificate see note 1.]

"He must possess a diploma of graduation from some literary or scientific institution of learning or certificate [for form of this certificate see note 2] from some legally constituted High School, General Superintendent of State Education, or Superintendent of some County or Parish Board of Public Education, attesting the fact that he is possessed of at least the educational attainments required of second grade teachers of public schools; provided, however, that if a student so applying is unable to furnish the above and foregoing evidence of literary qualifications, he may be permitted to matriculate and receive medical instructions as other students, and qualify himself in the required literary departments, and stand his required examination as above specified, prior to offering himself for a second course of lectures.

15. "The foregoing diploma or certificate of educational qualifications, attested by the Dean of the Medical College attended, together with a set of tickets showing that the holder has attended one full course of medical lectures, shall be essential to attendance upon a second course of lectures in any College belonging to this Association.

16. "Branches of Medical Science to be included in the course of instruction: Chemistry, Medical Jurisprudence, Anatomy, Pathology, Physiology, Hygiene, Materia Medica and Therapeutics, Theory and Practice of Medicine, Surgery, Obstetrics and Gynecology, and special laboratory work as hereinafter provided.

# "Qualifications for Graduation.

17. "Candidates for graduation, in addition to the usual requirements of medical colleges, must have attended three courses of lectures of not less than six months each in three separate years; must have dissected in two courses, and attended two courses of clinical or hospital instruction; and must have attended one course in each of the special laboratory departments, to-wit: 1. Histology and Bacteriology. 2. Chemistry. 3. Operative Surgery.

"These requirements shall not apply to any student who has received a course of medical lectures prior to September 1, 1893."

While the requirements and qualifications quoted in paragraphs 14-17 will be imposed by the Medical Department of the Tulane University of Louisiana, as a member of the Southern Medical College Association, yet the Medical Department will impose on all future candidates for graduation the following

## Additional Qualifications for Graduation.

18. Every student, in order to become a candidate for graduation, must be of good moral character; must be 21 years of age; must write a thesis on a medical or pharmaceutical subject and present it to the Dean between January 1 and March 1 of his last session; must have paid all college dues, including the graduation fee; and must pass satisfactory examinations before the members of the faculty.

19. Qualifications for the Graduation of a Student Who has Attended a full Course in a Medical College Prior to September 1, 1893.

(1)	Secretary (or Dean) of
	(City)(State)
Dear Sir:	Mrof
is a gentleman cal studies in y	of good moral character. I recommend that he be allowed to enter upon his medi- our college. He has been my pupilmonths. Yours, (Sign here)
(2)	20.
	Secretary (or Dean) of
Dear Sir:	I have examined Mr.
of	and find his scholastic attainments equal to those requisite attainments equal to those requisite ade teacher's certificate in our public schools. Yours,
	Supt. Pub. Iustruc.

He must comply with the above "Additional Qualifications" of Paragraph 18; must have attended in two separate years at least two full courses of lectures and of dissections, and the last of the two annual courses required must have been in this institution, and he must present evidence of having studied medicine for three years ending with the date of his graduation: one of these three years may have been passed in study under the direction of a regular graduate. In addition it is strenuously urged on every candidate for graduation that he should have taken, prior to his graduation, all of the laboratory courses specified in paragraph 17.

## Examinations After Two Annual Courses.

20. Students who have attended and paid for two courses, the last of which was in this institution, are permitted to undergo examinations upon one or more of the branches taught by the four chairs of Chemistry, Anatomy, Physiology, and Materia Medica. These examinations, if successful, will not be repeated, but if the applicant should fail upon one or more of them, he will be granted a second trial, when he shall present himself for final examination.

#### Attendance on Three or More Annual Courses.

21. Students who have attended and paid for all of the required full courses, the last of which was in this institution, are thereafter entitled to attend the lectures without charge; and it is the earnest desire of the Faculty that they should avail themselves of this privilege, to the extent, at least, of one additional course, before applying for graduation. It is gratifying to be able to state that of the one hundred M. D. graduates of 1894, fifty-eight had attended three or more courses; and their high standing at the final examination and their better preparation for the practice of their profession more than compensated them for their longer attendance upon lectures.

#### FEES.

22. It will be noticed that the fees of this institution will now amount to a total of \$465 for a three years' course, instead of \$335 for the former two years' course.

C nsidering the exceptional advantages for practical instruction in hospital and in laboratories, and the constant care and labor bestowed upon the pupils, the charges are as low as are compatible with the superior advantages given; and the Faculty therefore appeal to their professional brethren throughout the Southwest to continue their support to an institution which does not seek to increase the size of its classes by pecuniary rivalry and discreditable underbidding, but by offering a full equivalent for its charges.

#### Table of Fees.

## 23. FOR FIRST COURSE STUDENTS OF 1893-94 TAKING THREE FULL COURSES. .

	IST YEAR.	2D YEAR.	3D YEAR.
Matriculation FeeProfessors and Lectures	120 00	\$5 00 120 00 10 00	\$5 00 120 00
Chemical Laboratory Microscopical Laboratory Operative Surgery	15 00	15 00	10 00
Diploma or Graduation Fee			30 00
Totals	\$150 00	\$150 00	\$165 00

All fees are payable in advance, that is on admission.

24. Matriculation Fee.—In this, as in every college of the Southern Medical College Association, every person, whether student or graduate, admitted to the privileges of this College shall hereafter pay a matriculation or registration fee of \$5 for every session he may attend; and shall not be entitled to admission to either College or Hospital until registered. However, those students who took a full course and those who were graduated prior to September 1, 1893, will not be charged a matriculation fee for the session of 1894-95.

- 25. Breakage Fees.—A breakage fee of \$5 must be deposited for every course in the Chemical, in the Pharmaceutical and in the Microscopical Laboratory to reimburse needless injuries inflicted on these laboratories and their contents. At the end of every session the breakage fee will be refunded in whole or in part, depending on the charges incurred by the student.
- 26. All medical students who attended in any regular and reputable medical college and paid for one full course prior to September 1, 1893, and are to be candidates for graduation in 1895, must pay the same fees charged prior to September 1, 1893, viz.: for matriculation (if never paid in this college), \$5; for professors' fees, \$140; for demonstrator's ticket, \$10; and for graduation, \$30.
- 27. Graduates of this college and all medical students, who have paid all fees in the Table of Fees, will not be charged the professors' fees, but will be charged the matriculation fee and the fees for all laboratory courses they may voluntarily attend.
- 28. Students who do not attend full courses, but only partial or special courses, must pay for the tickets of the professors whom they may attend, \$20 each; for one course in the chemical and in the microscopical laboratories, \$20 each, and for other fees as in the Table of Fees.
- 29. Graduates of other recognized medical colleges must pay for the professors' fees, \$70, and thereafter will be entitled to the same privileges given to the graduates of this college. They can not, however, obtain its diploma without passing the final examination, without having attended the laboratory courses required of our graduates, and without paying the graduation fee.
- 30. Graduates in Pharmacy and in Dentistry will be credited the first year of the three years' course, but will not be graduated in medicine until they have attended all of the laboratory courses specified in paragraph 17.
- 31. After the next session, 1894-95, neither this nor any college of the Southern Medical College Association, nor probably any reputable medical college in the United States, will recognize either the courses or the diplomas of any medical college which may permit students to be graduated after only two courses, or which may require less for graduation than is demanded by the Southern Medical College Association.

#### Instruction in Pharmacy.

The Medical Faculty is also authorized by law to grant diplomas in Pharmacy, and has exercised this privilege since 1838, having now 246 graduates, 191 of whom have been graduated during the past sixteen years.

32. The students of Pharmacy are required to attend two annual courses of lectures given by the professors on Chemistry and Medical Jurisprudence, on Materia Medica and Therapeutics, and on Hygiene, and to attend one course in the Chemical and two courses in the Pharmaceutical Laboratory.

Instruction in the Pharmaceutical Laboratory is graded, and consists of a junior and of a senior course. These courses are designed to fit the student to conduct the processes of manufacturing and of dispensing in the most thorough and economical manner.

- 33. Reputable women are admitted as students to the Chemical and to the Pharmaceutical Laboratory, but not to the lectures of the professors.
- 34. Pharmacy students who may begin their first course after September 1, 1893, will be subjected to the educational "requirements for matriculation" enforced on medical students (see par. 14), and all candidates for graduation in Pharmacy must comply with the requirements specified in paragraphs 18 and 32, and must also submit to the Dean a satisfactory certificate of at least two years' practical experience under the instruction of a competent pharmacist.
- 35. Fees—The charge for one full course in pharmacy is \$75, viz.: for matriculation, \$5; professor's fee, \$35; chemical laboratory, \$15; and pharmaceutical laboratory, \$20. The fee for graduation is \$20. In addition every student must deposit a breakage fee of \$5 for the chemical and also for the pharmaceutical laboratory, in accord with paragraph 25.

36. Students in medicine who take also the course in pharmacy are required to pay only the laboratory fees. Students in pharmacy are not charged for the tickets of professors after attendance upon two full courses; but all students are charged for every laboratory course, however numerous these may be.

37. The Chemical and Pharmaceutical Laboratories will be opened for in-

struction on Monday, October 22, 1894.

## TEXT-BOOKS.

38. The books mentioned below are recommended in preference to others; but recent additions of any standard works may be used in their stead. Only one text-book on each branch is indispensable. The cost of a set of text-books on all the branches is about \$50. The prices affixed below are now the lowest prices of the cheapest copies, usually in cloth:

SURGERY—American Text-Book, \$7.00; Ashurst, \$4.75; Senn, \$4.50; Roberts, \$3.75; Wyeth, \$7.00; Moullin's Operative Surgery, \$7.00; Treves, two volumes, \$8.00; Garmany, \$2.00; Aseptic and Mind Surgery, Gerster, \$4.50, Wharton, \$2.70; Diseases of the Eye, Nettleship, \$1.80; Swanzy, \$2.70; Diseases of the Ear, Politzer, \$5.00; Sexton, \$3.60.

PRACTICE OF MEDICINE—Flint, \$4.75; Loomis, \$5.00; Pepper, \$10.00.

Dermatology—Van Harlingen, \$2.25; Ransom, \$1.00; Crocker, \$4.50; Shoemaker, \$4.50; Hyde, \$4.50.

Physiology—Foster, \$4.00; Yeo, \$3.00; Landois, \$6.00; Chapman, \$4.50.

HYGIENE-Wilson, \$3.00; Parkes, \$4.50; Richardson.

PATHOLOGICAL ANATOMY—Green, \$2.50; Coats, \$4.75; Ziegler, \$5.00; Payne, \$3.00; Delafield & Prudden.

Obstetrics—Playfair, \$3.45; Lusk, \$4.25; American System, \$20.00; Starr's Diseases of Children, \$7.00; Garrigue's Diseases of Women, \$—.

GYNÆCOLOGY—Skene, \$6.00: Thomas, \$4.15; Emmett, \$4.00; Pozzi, \$12.00. DISEASES OF CHILDREN—Smith, \$4.50; Day.

CHEMISTRY—Witthaus' Manual, \$3.75; Fownes, \$2 50; Attfield, \$2.50; Bloxman, \$4.00; Fresenius, \$4.00; Ganot's Physics, \$4.50; Parrish's Pharmacy, \$4.50.

MEDICAL JURISPRUDENCE—Taylor, \$4.50.

ANATOMY—Gray, \$5.80; Wilson, \$5.00; Richardson, \$4.00; Souchon's Résumé, \$2.00.

MATERIA MEDICA AND THERAPEUTICS—Wood, \$6.00; Rabuteau, \$7.00; Bartholow, \$4.10; Brunton, \$4.50; National Dispensatory, \$6.75.

DIAGNOSIS—DaCosta, \$6.00; Loomis, \$2.75.

DICTIONARIES-Dunglison, \$5.50; Gould, \$3.00; National, \$12.00.

CHEMICAL LABORATORY-Pellew, \$2.50; Simon, \$3.00.

MICROSCOPICAL LABORATORY—Histology—Prudden, \$1.25; Klein, \$1.75; Klein & Smith's Atlas, \$——; Bacteriology—Abbott, \$2.00; Sternberg, \$8.00.

PRACTICAL PHARMACY—Remington's Practice of Pharmacy, \$6.00; U. S. Pharmacopæia, \$3.50.

# Students Preparing to Enter College

39. Are recommended to study especially Gage's or Ganot's Physics; Fowne's Chemistry; Gray's Anatomy; Yeo's or Foster's Physiology, or any other standard works on these four subjects.

## Expenses, Etc.

40. Information about houses for boarding and lodging may be obtained by application to Oswald Belfield, Janitor. The price usually paid by students is \$20 per month.

For any additional information, address "Prof. CHAILLÉ, DEAN, P. O. Drawer 261." Letters thus officially addressed secure prompt attention even if

the Dean be absent.

STANFORD E. CHAILLÉ, M. D., Dean of the Medical Department.

## GRADUATES OF 1894.

At the Sixtieth Annual Commencement, held Wednesday, April 18, 1894, the Salutatory was delivered by Dr. Clarence Pierson, of Louisiana; the Annual Address by Prof. James H Dillard, M.A., of Tulane University, and the Valedictory by Dr. John F. Oechsner, of Louisiana.

Degrees were conferred on III graduates, viz.: 100 in medicine and II in pharmacy, as follows:

# TULANE UNIVERSITY OF LOUISIANA.

Tulane University of Louisiana embraces University Courses, Collège of Arts and Sciences, Collège of Technology, H. Sophie Newcomb Memorial Collège for Young Women, Law Collège and Medical Collège

At the beginning of the next session the literary and scientific branches of the University will be located in the new buildings now being erected on St. Charles Avenue, opposite Audubon Park.

The College of Arts and Sciences offers Classical, Literary and Scientific courses, leading to the degree of Bachelor of Arts or Bachelor of Science.

The College of Technology has extensive laboratories for Physics, Chemistry, Mechanical and Electrical Engineering.

Two new Professors have been added to the Faculty.

The changes made enable the Faculty to offer courses in Civil, Electrical and Mechanical Engineering and in Architecture; also, in Chemical Engineering, Sugar Chemistry, General Industrial Chemistry and some others.

The High School has been discontinued with the exception of the Sub-Freshman Class, whose members with conditioned students will constitute the sub-matriculate course of the College for the ensuing session.

The University grants about 175 scholarships in its Academic Departments. The tuition fee is \$80 for the annual session of eight and one-half months.

# H. SOPHIE NEWCOMB MEMORIAL COLLEGE.

"The H. Sophie Newcomb Memorial College in the Tulane University of Louisiana, for the higher education of white girls and young women," has been established as a department of Tulane University through the munificence of Mrs. Josephine Louise Newcomb, of New York City.

Prof. Brandt V. B. Dixon is President of the College, and is aided by an efficient faculty.

Special courses are offered to those who find it desirable or necessary to restrict, their work to one or more branches.

There is an Academic Department, which prepares students for the College. The charge for tuition in the College is \$100, and in the Academy \$80, payable in quarterly instalments.

Provision is being made for the accommodation of boarding students by the erection of a building for the purpose opposite to the College.

Through the increased liberality of Mrs. Newcomb there will also be erected during the summer for the opening of the next session a College Chapel and an Art Building.

#### LAW DEPARTMENT.

The Law Department was organized in 1847. Under a series of distinguished professors it has been in successful operation ever since.

The degree of Bachelor of Laws, granted by the University, entitles the person on whom it is conferred to admission to the bar of this State. The Faculty aim to prepare the students for admission to the bar, not only in this State, but also in any of the common-law States of the Union. The charge for lectures and instruction is \$80. The annual session begins in November and closes in May. Judge Henry C. Miller, Associate Justice Supreme Court of Louisiana, is Dean.

For catalogue, address

WM. O. ROGERS,

## DESCRIPTION OF THE NEW BUILDING,

WITH DIAGRAMS OF FIRST, SECOND AND THIRD FLOORS.

The general plan consists of a central building to provide two large lecturerooms, one above the other; and of two wings chiefly for laboratories, but also for library, museum, offices, recitation and private rooms.

The disposition of the building for special purposes, and the seating capacity of lecture rooms and laboratories are indicated in the diagrams.

An unusually well lighted, well floored, dry and commodious basement (beneath the first floor and not presented in the diagrams) provides ample storage rooms, and also excellent rooms for the greater comfort of students, such as a study room, smoking room, etc.

The lecture rooms, laboratories, and all rooms except those in the basement, are free from all posts and pillars; and the two lecture rooms are abundantly lighted and ventilated, and each has a seating capacity of about 500.

The Microscopical Laboratory is believed to surpass in size (seating nearly 100 students), in lighting and in ventilation any in the United States.

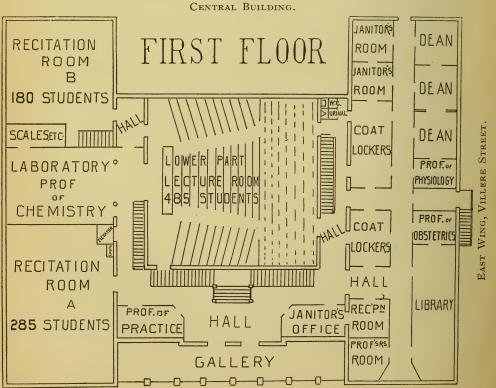

The students' Chemical Laboratory has the same size and superiorities.

The Dissecting rooms are believed to be unsurpassed in all essentials and can accommodate 200 students at work at the same time.

Lavatories and urinals are conveniently located on every floor.

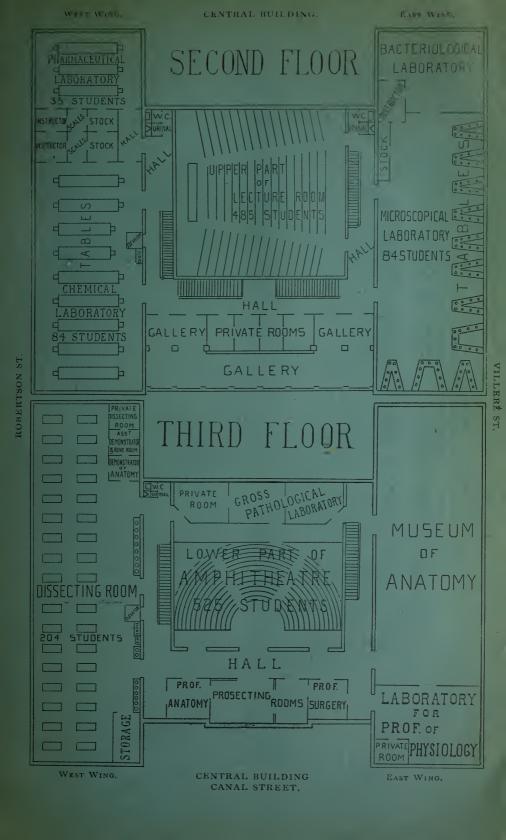

The building supplies several private rooms for special work of students or graduates.

The College lot measures about 256½ feet front on Canal, 199½ feet on Villeré street, 313½ feet on Robertson street, and 102½ feet on Customhouse street; containing therefore about 62,764 square feet, while the building occupies only 16,528 square feet; thus leaving ample space for ornamental and recreation grounds at present, and for extension in the future.

CANAL STREET.

WEST WING, ROBERTSON STREET.
